## SICK POLICY

---

To help ensure the health of our students, faculty, and staff, the following guidelines will be followed:

- Students should come to school in good health. Students should not attend school with a temperature above 99.5, or signs of a communicable illness (this includes students who have vomited or displayed symptoms of a stomach virus within the past 24 hours).
- In the event that a student is sick and needs to be picked up from school, we will call both parents/legal guardians. In the event that a parent/guardian cannot be reached, we will call the emergency contact listed.
- Sick students will be separated from the team and supervised by a staff member until picked up.
- Students indicating they do not feel well will have their temperature taken. If the student has an elevated temperature of 100.3 or greater, or is unable to participate in school activities, the parent will be notified and the student must be picked up.
- Students with stomach viruses (diarrhea/vomiting) will be sent home from school. The student must stay home until symptoms have subsided for 24 hours.
- Students should be fever-free, without the use of medication, for 24 hours before returning to school.
- Minor injuries will be treated at school, per parental approved medication and treatment list. If the injury needs medical attention, we will contact the parents to pick up the student. If there is an emergency that requires immediate emergency medical attention, we will contact 911, followed by notifying the parents.
